BALANCED SCENARIO

₹3.99 Cr

Our recommendation for a credible national Year-1 push.

Conservative ₹1.85 Cr

Aggressive ₹7.90 Cr

01 STRATEGIC APPROACH

The sale is decided in two places.

A homeowner rarely names a board brand — the carpenter recommends it and the dealer stocks what moves. Four pillars, and every rupee maps to one.

PILLAR 01

1

Win the carpenter

The true decision-maker. Nukkad meets, a loyalty program, samples and recognition make Echon the default recommendation at the point of fabrication.

PILLAR 02

2

Arm the counter

Dealers & distributors are the revenue engine. Signage, counter branding, samples, meets and trade visibility help the sales team onboard and sell through.

PILLAR 03

3

Build consumer pull

ATL, always-on social, influencers, the visualizer and experience corners make consumers ask for Echon by name — easing the channel's job.

PILLAR 04

4

Convert credibility

Translate 22 years and 'India's largest exporter' into domestic trust — through PR, content, AID engagement and project specs, government & private.

02 MARKETING OBJECTIVES

Five objectives, five measurable Year-1 targets.

1	**Build brand salience** Establish Echon as the branded leader in PVC blend-based building materials — the new-age alternative to wood.	**Recall & reach in 8 anchor markets**
2	**Facilitate channel expansion** Help the sales team onboard and activate dealers / distributors and arm them to sell through.	**400 dealers across 40 cities**
3	**Win the influencer layer** Carpenters above all, plus architects, interior designers, contractors and builders.	**8,000 carpenters · 1,000 AID**
4	**Generate qualified demand** Dealer, retail, project (govt & private) and consumer enquiries that feed sales targets.	**12,000–18,000 leads / year**
5	**Run a measurable, ROI-driven engine** Reported monthly against sales facilitation, not vanity metrics.	**~₹70 Cr revenue enabled**

Three segments, three jobs.

The channel sells, the influencers recommend, the consumer pulls. Marketing serves all three at once.

SEGMENT 1

Channel & Direct Sales

THE REVENUE ENGINE

Dealers & distributors, retailers and large projects — government and private. The stock points that move volume.

Trade visibility, dealer/contractor meets, loyalty, samples & catalogs, exhibition leads, project-spec support, corporate AV.

Goal: Onboard, stock, sell-through

SEGMENT 2

The Influencers

THE RECOMMENDERS

Architects, interior designers, builders/contractors — and most importantly carpenters, who specify and fabricate.

Carpenter nukkad meets + loyalty, AID engagement & CPD, visualizer / 3D plugin, technical content, samples & recognition.

Goal: Become the default recommendation

SEGMENT 3

End Consumers

THE PULL

Homeowners, renovators and self-builders choosing durable, low-maintenance surfaces over wood.

ATL, always-on social, influencer content, website + visualizer, performance lead-gen, experience corners, brand ambassador.

Goal: Create pull

Match spend to ambition.

Three scenarios. Balanced (₹3.99 Cr) is our recommendation — deliberately channel- and influencer-heavy.

CONSERVATIVE

₹1.85 Cr

A focused, anchor-first build. Proves the model before scaling.

BALANCED ★

₹3.99 Cr

A credible national Year-1 push — all engines funded. Recommended.

AGGRESSIVE

₹7.90 Cr

Adds a brand ambassador, full TVC burst & richer experience centres.

Each total is all-in: 80% working media + 20% agency fee. Balanced = ₹3.19 Cr media + ₹0.80 Cr agency = ₹3.99 Cr.

Where the money goes — Balanced
